## Games

### (01) Karjakin, Sergey (2760) - Savchenko, Boris (2632) [B35]

Moscow TCh-Student Final Moscow RUS (1), 28.11.2010

[IM Polivanov, A]

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 g6 5.Nc3 Bg7 6.Be3 Nf6 7.Bc4 0-0 8.Bb3 d6 9.f3 Bd7 [For information about 9...Nxd4 10.Bxd4 Be6 one may see Dvoiryis-Timofeev, CZM 12/2010] 10.Qd2 Na5 [10...Rb8? (to conduct b5) means simply to give the pawn on a7 – 11.Nxc6 – Bb3 was played for it, so on b2 was not under strike.] 11.Bh6 Bxh6 12.Qxh6

12...e5 [Now b5 could be carried out without the aid of rook, although 12...Qb6!? 13.0-0-0 Nxb3+ 14.cxb3 a5 → also suitable, Nataf-Bu, Reykjavik 2004] 13.Nde2 b5! [This is the exact move order – 13...Nxb3 14.axb3 b5 15.Qd2 b4 (15...Qb6 16.b4!) 16.Na2! d5 17.exd5 a5 18.c4!, Svetushkin-Nikolaidis, Litothoro 2006, is for benefit of White.] 14.Nd5 [14.Qd2 b4, and the knight has no square on a2.] 14...Rc8!?N [An interesting novelty, but 14...Nxb3 15.Nxf6+ Qxf6 16.axb3 d5, which met earlier, also led to the equation: (16...b4!?) 17.Nc3 dxe4 18.Nxe4 Qe7 19.Ra6 f5 20.Ng5 Qg7, Ganguly-Zhao, Sydney 2008] 15.Ne3 Be6 16.h4 Nxb3 17.axb3 d5! Black made a program promotion – opening problems are solved. 18.exd5 Nxd5 19.h5 Qe7 [Standard for such cases 19...g5! 20.Rd1

Qf6 21.Qxf6 Nxf6 22.h6 Rfd8 looked good with an approximately equal position.] 20.Nxd5 Bxd5 21.Nc3 Bc6 22.0-0-0 Rfd8 23.hxg6 fxg6 24.Qe3 b4 25.Ne4 a5 To open the line "a". 26.Kb1 Favourite Karjakin's move! 26...a4 27.Rxd8+ Qxd8 28.bxa4 Bxa4 29.b3 Bb5?

[Knight e4 – the most powerful piece of White, so it was necessary to choose 29...Bc6 to neutralize it.] 30.f4! White immediately uses opponent's error – now Black has to part with a pawn. 30...Qe7 [30...exf4 31.Qxf4 Rc6 32.Ng5+–] 31.Ng5 Qc5 32.Qxc5 Rxc5 33.Ne4 Rc8 34.fxe5 Kg7 35.Ng5 [Karjakin planned to exchange pawns b4 and e5, but perhaps more accurate to strengthen it: 35.Re1! – with further Nd6, Re3, Kb2, c4...] 35...h5 36.Rh4 Re8 37.Rxb4 Rxe5? [The best chance for the draw gave 37...Bc6! 38.Nf3 Bxf3 39.gxf3 g5! – counterplay associated with pawn "h" can be very dangerous.] 38.Nf3 Rf5 39.Nd4 Rf1+ 40.Kb2 Ba6 41.Rb6 Bc8 42.Rc6

**42...Rf8?!** [42...Bf5 43.Nxf5+ Rxf5 was more persistent, but after 44.Rc3 pawn g2 delays Black's passer, and the pair "b+c" is moving forward.] **43.b4 Kh6 44.g3** Withdrawing pawn under from the Bb7. **44...Bb7 45.Rd6 Rg8 46.Ne6!** [Deadly accuracy. 46.c4 may also lead to the goal, but why allow to counterplay Kg5-g4? There is no such need.] **46...Bc8 47.b5 Re8 48.Nf4 Bf5 49.b6 Kg5 50.Nd5 Rc8 51.Ne3** Excellent position for the knight – defending on c2, not letting to g4, and supporting c4. **51...Be4 52.c4 h4 53.Rd4!** [Black had hoped for 53.gxh4+ Kf4, although it's also losing: 54.Nd5+ Ke5 55.Rd7, and there is no 55...Rxc4 – 56.b7] **53...Bh1 54.gxh4+ Kf6 55.Kc3 Rc6 56.b7 Rb6 57.Rd6+ 1-0**

**(02) Fier,Alexander Hilario T (2572) - Leitao,Rafael (2626) [B42]**

77th ch-BRA Americana BRA (3), 01.12.2010

[IM Polivanov, A]

**1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 a6 5.Bd3 Bc5 6.Nb3 Ba7 7.Qg4!?**

Immediately using the fact that the bishop had gone from f8. **7...Nf6** [Weakening the black squares by 7...g6 is undesirable: 8.Qg3 Nc6 9.Nc3 d6 10.h4 Nf6 11.Bh6±, Grischuk-Istratescu, FIDE WC 2005] **8.Qg3 8.Qxg7 Bxf2+!** **8...d6 9.Nc3 Nc6 10.Bg5 h6** It's hard to tolerate such a pin. **11.Bd2 Ne5 12.Be2 b5 13.f4 b4?!** [This attempt to play on the interception of the initiative is not very justified. More reliable was 13...Ng6, and 14.e5 dxe5 15.fxe5 gives nothing – (15.Bf3 exf4!) 15...Bb8! 16.Qf3 Nd5] **14.fxe5 bxc3 15.Qxc3 Bf2+N** [Depriving a castling of opponent, but at the same time, spending precious time. Previously encountered 15...dxe5 16.Qxe5 Bb7 17.0-0-0 Qb8?! (~~Ng7~~...Bxe4) 18.Qxb8+ Rxb8 19.Bf4 Rc8 20.e5 Nd5 21.Bf3 Rc7 22.Na5 Ba8 23.Bd2±, Solodovnichenko-Sabria Batlle, Barcelona 2009] **16.Kf1 dxe5 17.Qxe5 Ba7** Black threatens by Qb6 with mate threats. **18.Bb4!** Preventing castling and mitigating risk of thrust Qb6, but Black has not any different at the disposal. **18...Qb6 19.Bc5 Qc6 20.Rd1 Bxc5 21.Qxc5** Of course, the endgame will be beneficial to White – he has extra material. **21...Bb7 22.Qxc6+ Bxc6**

**23.Nc5!** [In case 23.e5 Nd7 pawn would be won back - now it won't.] **23...Ke7** [23...Bxe4 24.Nxe4 Nxe4 25.Bf3 f5 26.Ke2, and e4 is lost.] **24.e5 Nd7 25.Nxd7** [25.Nxa6 Nxe5 26.Nb4 was also good.] **25...Bxd7 26.Kf2 Rhc8 27.Bd3 Rc5 28.Rhe1 Bb5 29.b3 Rc3?!** [A feeling that after the exchange 29...Bxd3 30.cxd3 drawish chances would have been higher - at least, black pieces were becoming active: 30...Rd8 31.d4 Rc2+ (31...Rcd5 32.Ke3 f6 33.exf6+ gxf6 34.Re2 e5 35.Red2+-) 32.Re2 Rc3] **30.Be4 Rac8 31.a4** [31.Re3!? was interesting, as sacrifice of exchange is not dangerous: 31...Rxc2+ 32.Bxc2 Rxc2+ 33.Kg1 Rxa2 34.Rc1] **31...Bc6 32.Bd3 a5 33.g3 Rd8 34.Re3 Rc5**

**35.c4!** Very strong, concrete move. Pawn b3 is weakened and bishop is got blunted,

but however square d5 is taken away from the rooks - is now the most important thing. **35...Rb8 36.Bc2 Be8 37.Ke1** King moves to c3. **37...Rb6 38.Rd4 Bd7 39.Kd2 Be8 40.Kc3 Rb4 41.Bd1** Now, improving the position of the bishop - it has nothing to do on this diagonal, but on e2 it will play when the pawn c4 will go forward. **41...Rb6 42.Be2 Ra6 43.Rg4 Kf8 44.Kd4 Rac6 45.h4** Before proceeding to action on the queenside, White defines the situation at the king one. **45...Rc8 46.Rf4 Ke7 47.g4**

**47...R5c7** [Very much passive. One could try 47...f6 48.Rfe4 Bd7, although White punches defense after 49.Bd3 R5c7 50.exf6+ gxf6 51.g5! hxg5 52.hxg5 e5+ (52...fxg5 53.Re5) 53.Kc3 Rc5 54.gxf6+ Kxf6 55.Rf3+ Ke7 56.Rh4] **48.g5 hxg5 49.hxg5 Rd8+ 50.Kc3 g6 51.Rd4 Rb8 52.Rd6** White is going to get to the a6 - he is hampered, but not for long. **52...Bc6 53.Bf3** [Already there Black ceased resistance. But he can be understood: 53.Bf3 Bxf3 (53...Be8 54.Ra6 Rc5 55.Ra7+ Kf8 56.Kd4 Rbc8 57.Rc3!, and Black has no moves) 54.Rxf3 Rcb7 55.Kc2 Rc8 56.Ra6 Rc5 57.Re3 Rd7 (otherwise Kc3-d4) 58.Rb6! with a further Rb5 - won easily.] **1-0**

**(03) Gleizerov, Evgeny (2572) - Drasko, Milan (2479) [E00]**

XXIII Belgrade Trophy Obrenovac SRB (9.5), 02.12.2010  
[IM Polivanov, A]

**1.d4 e6 2.c4 Nf6 3.g3 Bb4+ Bogoljubow Defence. 4.Bd2 c5!?** The idea of this variant is to impede a development of knight b1 by pawn b4. **5.Bxb4 cxb4 6.Bg2 0-0 7.e4 d6 8.Ne2 Nc6** Black's plans are to go Bd7 and a5, so one needs to hurry with break a2–a3. **9.a3 Qb6 10.Qd2 Re8N**

[Earlier Drasko tried 10...Bd7 11.axb4 Qxb4 12.d5 exd5 13.exd5 Qxd2+ 14.Kxd2 Ne5 15.b3, Brunello–Drasko, Cannes 2009,, but eventually lost. So he wants to prevent the advance d4–d5.] **11.axb4 Qxb4 12.Na3 a6** Apparently, hindering Nb5, although it is still possible. **13.f4!** With the firm intention to take the space after the e4–e5. **13...Rb8** [More fundamental was 13...e5 14.fxe5 dxe5 15.d5 Rd8, although under 16.Qxb4 Nxb4 17.Kd2 White has an edge.] **14.e5 dxe5 15.fxe5 Ng4 16.h3 Nh6** [16...Ne3 17.Be4 and knight will have problems.] **17.g4 Bd7 18.Nc3** White wants to castle without the swapping of queens, but now pawn d4 is weakened, which can be used. **18...Na5** [Exchange of inaccuracies. Sharp 18...b5?! does not give anything for a reason 19.Nc2! Qxc4 20.Ne4; 18...Red8! 19.0-0 Be8 is stronger, and White will have to give away a bishop.] **19.Nc2** [19.Ne4!? Qxd2+ 20.Nxd2±] **19...Qb6 20.c5 Qc7 21.Ne4!?**

[Creative idea, but simple 21.Qg5! keeps an advantage without any frills; less clear 21.Nd5 exd5 22.Rxa5 f6!↗] **21...Nb3 22.Nf6+ Kh8** [Drasko has believed opponent, although 22...gxf6 23.Qxh6 Bc6! seemingly leads to a draw: a) 23...Nxa1? 24.Be4!+- (24.exf6?? Qg3+ 25.Kf1 Qd3+ 26.Kg1 Qg6-+); b) 23...Nxd4 24.0-0-0!; 24.0-0 fxe5, and there is nothing better than perpetual check.] **23.Nxe8 Bxe8 24.Qc3 Nxa1 25.Nxa1 Ng8** [Improving the position of the knight. 25...Bb5! 26.Nc2 Qe7! looked quite good too, and now followed by the check to h4, while the king has not castled yet.] **26.Nc2 Ne7 27.0-0 Ng6?** A gross positional error, after which the position of Black rolled down the slope. Knight has no prospects on the kingside – worth to keep it closer to the center in order to jump on d5 or c6 in good time. [27...Kg8 (to free the bishop e8) 28.Na3 Rd8 29.Nc4?! Bb5 30.b3 Nc6 31.Bxc6 (differently it will be strike on d4) 31...Qxc6 32.Rf4 g5!, and Black even intercepts the initiative.] **28.Ne3** White start to fulfill his plan – transfer the knight to d6. **28...Nh4 29.Be4 Bb5 30.Rf2** Swoops are over. **30...Rd8**

**31.b3!!** Brilliant move. When the knight goes to c4, Back will take it for sure, and then line "b" will be opened for the white rook. **31...Kg8** [Too late. One could try to twist the position after 31...f6!? 32.Nc4 Bxc4 33.bxc4 fxe5, but there is exact 34.d5! counting on 34...Qxc5 (34...Ng6 35.Qe3) 35.Qg3 Ng6 36.Bxg6 hxg6 37.Qh4+] **32.Nc4 Bxc4 33.bxc4** Pawn b7 is doomed. **33...Qe7 34.Qe3!** Depriving Black of all counterplay related with Qg5. **34...Ng6 35.Rb2 Qd7 36.Bxb7 Qxd4** [The exchange of queens does not leave Black any chance, though and after 36...Qa4 37.Rb1 Qxc4 38.c6 White must win.] **37.Qxd4 Rxd4 38.Bxa6 h5 39.c6 hxg4** [Paying off a piece for the pawn could still be through 39...Ne7 40.c7 Rd7. Now it is the end of everything.] **40.c7 Ne7 41.Rb8+ Kh7 42.Rd8** [Gleizerov did not check whether the opponent has find a trap 42.Re8 Rd1+ 43.Kg2 Rd2+ 44.Kg3 Nf5+ 45.Kxg4 Rd3 46.c8Q?? Rg3+ 47.Kf4 g5+ 48.Ke4 Re3#] **1-0**

**(04) Vescovi, Giovanni P (2622) - Leita, Rafael (2626) [D12]**

77th ch-BRA Americana BRA (7), 04.12.2010

[IM Polivanov, A]

**1.Nf3 d5 2.d4 Nf6 3.c4 c6 4.e3 Bf5 5.Nc3 e6 6.Nh4 Bg6 7.Be2 dxc4** [Relatively new method of solving the problem of bishop g6, although it is recognized that 7...Nbd7 8.0-0 Ne4!? is a little bit brighter – Inar- kiev–Shirov, CZM 08/2008] **8.Bxc4 Bh5** All

sense of early taking on c4 consists in this move. **9.Be2 Bxe2 10.Qxe2 c5 11.Qb5+!?N**

[A good way to put a problem in front of an opponent. 11.Nf3 Nc6 12.0-0 cxd4 13.Rd1 met in next game: 13...Be7 14.Nxd4 Qb6 15.Nxc6 Qxc6 16.e4 Rd8!, and Black finally equalized, Eljanov–Jakovenko, Plovdiv 2010] **11...Qd7 12.dxc5 a6** [12...Qxb5 13.Nxb5 Na6 14.a3 Bxc5 15.b4 Be7 16.Bb2] **13.Qxd7+ Nbx d7** [Deterioration of the pawn structure could have been avoided if 13...Nfxd7 14.b4 b6, but then White grabs line "b": 15.Rb1!] **14.c6 bxc6 15.Ke2** From the opening White came out with a small but stable edge. Weakness on c6 causes Black a lot of headache. **15...Bd6 16.Nf3 Ke7 17.b3 Rhc8 18.Bb2 Nb6 19.Nd2** Translation of the knight on e4 to take the square c5 in future. **19...Kf8 20.Nce4 Nxe4 21.Nxe4 Be7 22.Rhc1 a5 23.Bd4 Nd7 24.Nc5 Nxc5 25.Bxc5 Ke8** [Here and later was the opportunity to go 25...a4, but it has own drawbacks – after 26.b4 appears outpost on c5, and pawn a4 has the potential to get lost (Rc5–a5).] **26.Rc4 Bxc5 27.Rxc5 Kd7 28.Rac1 Ra6 29.R1c4** Now a5–a4 can already be forgotten. **29...Kd6**

**30.Rh5!** Great idea! White alternately attacking weakness on a5, h7, resulting in Black torn between them. **30...Rh8** [30...h6 31.Rg4 Rg8 32.Rxh6] **31.Rd4+ Ke7** [31...Kc7 32.Rg4 g6 33.Rh6 Δ Rgh4] **32.Ra4 f5** **33.e4!** Having called the new weakness, the rook returned to the line "c". **33...Kf6 34.Rh3 c5?!** [Apparently, Black feared Rd4, but it was better to untie the hands of a rook through 34...h6] **35.Rc3 Rc8 36.Rc2** Rook goes to c3, to avoid the strike after the break b4. In response, Black decided to counterattack at e4. **36...Ke5 37.h4!** Veskovi wants to banish the king by f4, but first rules out the possibility of g5. **37...g6 38.Ke3 Ra7** [Next variation is illustrative: 38...f4+ 39.Kf3 h6 40.Rac4 Rac6 41.a3 g5 42.b4 axb4 43.axb4 Kd6, and a full exchange on c5 leads to won endgame.] **39.f4+ Kd6 40.b4!** Now, in addition e5+, threatens b5, and this passer can become secured (Rac4, a4). **40...fxe4 41.Kxe4 c4 42.bxa5** [42.b5 no longer suitable due 42...Rb8 43.Rb2 c3, but there is no such need – the White just wins a pawn.] **42...Rc5 43.Rcxc4 Rxa5 44.Rd4+ Ke7 45.Rxa5 Rxa5 46.a4** This passed pawn will be the ending's protagonist. **46...Kf6** Black is going to get rid of the weakness on e6. **47.g4 e5 48.g5+ Ke6 49.fxe5 Rxe5+ 50.Kd3**

**50...Ra5?** [It was worth to make a passing of white king to pawn difficult: 50...Rc5!? 51.Rc4 Ra5 52.Kc3 Kd5 53.Rb4 (53.Kb4?? Rxa4+) 53...Kc6 – if the king is able to block the passer "a", a rook will find freedom, and then will be some chances to draw.] **51.Kc3 Ke5 52.Rb4?!** [Rook takes square b4 away from the king – more accurate 52.Rg4 Ra8 53.Kb4 Kd5 54.a5 Rb8+ 55.Kc3 Rc8+ 56.Kb3, and the rook will be on a4, guiding a pawn ahead.] **52...Ra7?!** [A strange decision – the black king goes to the right, but it got not any chance there, and precious time is lost. 52...Kd6 53.Kb3 Kc6] **53.Rb5+ Kf4** [53...Kd6 54.a5 Kc6 55.Kc4 Re7 is more stubborn, though, after 56.Rb6+ Kc7 57.Kd5 Rd7+ 58.Kc5 White should win.] **54.Kb3 Kg4 55.Rb4+ Kf5 56.Rc4** Now the position is won by "hands" – a passed pawn "a" promotes automatically. **56...Ke5 57.Kb4 Kd5** [57...Rb7+ 58.Kc5 Rc7+ 59.Kb5 Rb7+ 60.Kc6 Ra7 61.Kb6+–] **58.Rc5+ Kd6 59.a5 Rb7+ 60.Rb5 Rf7 61.a6!** a5 is the loophole for the king in case of checks. **61...Kc6** [61...Ra7 62.Rb6+ Kc7 63.Kb5] **62.Ra5!** Second exact move – the threat to resume a pushing pawn to a6 as soon as possible in order to the black king has no time to take the line "a". **62...Rf4+** [62...Kb6 63.a7; 62...Ra7 63.Ra1 Kb6 64.Ra2! Kc6 65.Ka5+–] **63.Kc3 Rf8 64.a7 Ra8** [64...Kb7 65.a8Q+ Rxa8 66.Rxa8 Kxa8 67.Kd4] **65.Kc4** Black is in zugzwang. **65...Kb6** [65...Kb7 66.Kb5!] **66.Ra2 Rc8+ 67.Kd5 Ra8 68.Ke6**

King is just going to take on h7. **1-0**

Now bishop has a sanctuary on f1. **10...Be6** [In one of Karjakin games was 10...b5 11.Bf1 Rb8 Δ b4 12.Bg5 Ng4 13.Bc1 Qb6 14.Qd2 Nf6, Karjakin-Van Wely, Foros 2007, and Sergey recommends here 15.Nd5 Nxd5 16.exd5 Na5 17.Qb4 Δ a4, Nxe5] **11.Nd5 b5 12.Bb3!N** [Much stronger than 12.Bf1 with the illustr-

ative variation 12...Nxe4 13.c4! (13.Bb6 Qb8 14.Rxe4 Bxd5 15.Qxd5 Qxb6) 13...bxc4 14.Bb6 Qb8 15.Bc7 Qb7 16.Rxe4 Bxd5 17.Qxd5 Rac8! (17...Qxc7? 18.Rxc4) 18.Bxd6 Rcd8, and Black is OK.] **12...Bxd5** [On 12...Nxe4 White undoubtedly prepares 13.a4! – Black got some problems, for example 13...Rb8 14.axb5 axb5 15.Nxe7+ Nxe7 (15...Qxe7 16.Bd5!) 16.Ba7±] **13.Bxd5 Qc7 14.c3 Nxd5 15.Qxd5** [Obviously, 15.exd5? would be a gross positional error – because d6 pawn in this case ceases to be a potential weakness.] **15...Bf6** To go Ne7, and ideally – d6–d5. **16.Red1 Rfd8 17.a4** Along the way, White creates one more weakness for the opponent – on b5. **17...Ne7 18.Qd3 Qc6 19.axb5 axb5 20.Rxa8 Rxa8**

**21.h4!?** [Of course, taking on d6 is unthinkable now – 21.Qxd6?? Qxd6 22.Rxd6 Ra1+, that's why Karjakin makes a ventlight; transfer to b4 – 21.Ne1!?! – was interesting too.] **21...h6** Black corresponds the same in order to have Qxe4 on Qxd6, and Qd8 is no longer threatened. **22.Bg5!** Excellently played! White is clinging to the cover of the black king, so the problems begin. **22...hxg5 23.hxg5 Rd8** [Black decided to go for double pawns, although it was possible to part with this luckless pawn d6: 23...Bxg5 24.Nxg5 f6 25.Ne6 Kf7 26.Qxd6 Qxd6 27.Rxd6 Nc8 28.Nd8+ (28.Rc6 Ne7=) 28...Ke7 29.Rd2 Nd6 30.Nc6+ Ke6, and the pawn will be difficult to realize.] **24.gxf6 gxf6 25.Nh2!** The

knight goes on g4, whereas it will create a lot of threats. **25...d5 26.Ng4 d4 27.Qg3 Ng6** [27...Kf8 28.Qh4 Ng8 29.Nxe5!] **28.Qf3! Kg7 29.Ne3 Ne7** Black reflected the primary threats, but the position remains precarious. **30.Qg4+ Kf8 31.Qh4 Kg7 32.Rd3**

Of course, White can not settle for a draw, but continues to play for win. **32...Qb6** [Black wants to get rid of the annoying knight e3, though 32...b4!? deserves of attention – and if 33.cxd4?! Rxd4, White has to force a draw: 34.Qg3+ (34.Ng4 Qc1+! 35.Kh2 Qg5) 34...Kf8 35.Rxd4 exd4 36.Qb8+ Kg7 37.Qg3+] **33.cxd4 exd4** [33...Rxd4 34.Ng4! (there is no check anymore) 34...Ng8 35.Rg3 Kf8 36.Qh8+–] **34.Qg4+** [34.Nf5+ Nxf5 35.exf5 does not give anything for a reason 35...Kf8, and the king goes out of the danger zone.] **34...Kf8 35.Qd1 Ke8?!** Protecting on d8, Nepomniachtchi again threatens to take on e3. But White found a remarkable objection. [35...Qc5 36.Nc2 (36.Nd5 f5!) 36...Nc6 was more prudent.] **36.Qh5!** It turns out that the knight does not have necessarily go away. **36...Rd6** [36...dxe3 37.Qh8+ Ng8 38.Qxg8+ Ke7 39.Rxd8 (39.Qxd8+?? Qxd8 40.Rxd8 e2+) 39...exf2+ 40.Kf1 Qxd8 41.Qxd8+ Kxd8 42.Kxf2, and pawn endgame is won easily.] **37.Qh8+ Kd7 38.Ng4 Qc6** Black wants to counter-attack (check on c1), but this move has drawbacks. **39.e5!?** [This is program promotion (due to

a plug on e5), but it is possible that moving that after 39.Ra3 Nc8 was even better.] **39...Ng6?** A crucial mistake. Now the king embarks on a journey from which he did not get out alive. [It was necessary to choose 39...Qc1+ 40.Kh2 fxe5 41.Qxe5, and exact 41...Qc7! leaves the pawn d4, and the chance for salvation with it.] **40.Nxf6+ Ke6 41.Qh3+ Kxe5 42.Ng4+ Kd5**

[42...Ke6 43.Nh6+ Kd5 44.Qe3!+– (44.Nxf7? Qc1+ 45.Kh2 Qf4+)] **43.Rd1!** This fine move decides the fate of the game. The fact that now threatens check by rook on c1 after Ne3. **43...Qe8** [Loses by force, but there is no appropriate defence. One can try 43...Ne5, though, then easily wins 44.Qh5 f6 45.f4] **44.Qf3+ Qe4** [44...Kc5 45.Qa3+ Kd5 46.Rxd4+ Kxd4 47.Qxd6+ Kc4 48.Ne3+] **45.Qxf7+** [45.Nf6+ Rxf6 46.Qxf6 Nf4 is not enough.] **45...Qe6 46.Ne3+** Before finishing the game, Karjakin gives a couple of harmless checks. **46...Ke5 47.Ng4+! Kd5** [47...Qxg4 48.Re1+ Qe4 49.Qe8+] **48.Qb7+ Kc4 49.Rc1+** [49.Rc1+ Kb4 50.Qa7 with mate.] **1-0**
